

## Management via the Rentio platform

Everything that is important to be able to rent out and manage your property

### Payment follow-up

Rentio helps the manager to monitor your rent

### Mobile and online

The platform can be used on the smartphone + online on PC / Laptop

### Quickly identify problems

Problems are reported on mobile and followed up via the task module.

### Follow up as desired

Follow everything from behind your PC or smartphone with your own login

## Why does **your manager** use Rentio?

It would be easy if my tenants always pay nicely on time and the contract would be indexed. My tenant prefers to stay informed on a mobile basis, doesn't it? It would be useful if I could keep up with problems in my home. My tenants must be informed annually of mandatory certificates and insurance.

All these things are offered by Rentio to landlords and managers. Moreover, you can do all of these from your laptop AND smartphone.

In addition, you can also arrange rental deposits via Rentio, have contracts signed digitally, get a view of potential tenants of your properties, arrange fire insurance, ...

### Online **and** on your smartphone

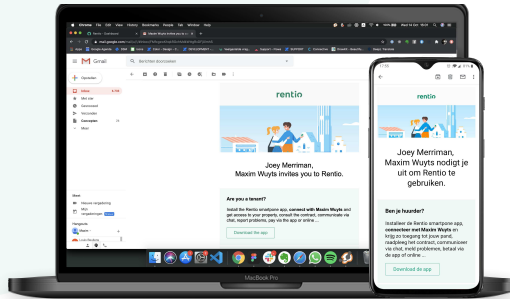

Scan the QR for the app or browse to <https://dashboard.rentio.be/>

# Rentio ready in 3 steps

1

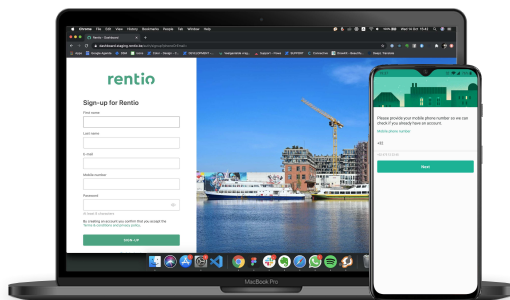

## The invitation

You will receive an email from Rentio with the request to start using Rentio. You can open both the app and the online tool from this email to create an account.

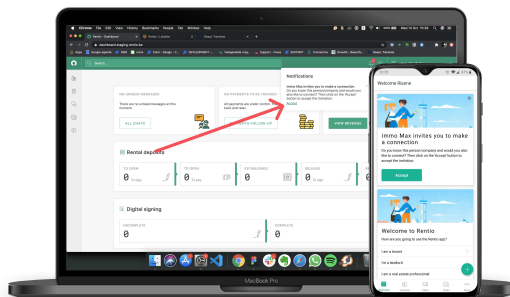

2

## Create an account

Create your account via the dashboard or the app. Both your mobile number and email address must be verified in order to ensure a secure environment. Your login details are the same on the app as in the Dashboard!

3

## Make a connection

You will be asked to connect with your broker. Just click on "Accept" and you will see your building, tenants, documents, .... In the Dashboard the connection request is placed behind the bell at the top right!
